

VIDYA TV

Senior Storage & Backup Administrator

PRIMARY STORAGE	- NetApp Dell EMC Isilon Brocade Switch VMAX PowerMax
BACKUP SOLUTIONS	- Dell EMC Networker Commvault
SAN / NAS	- SMB NFS CIFS LUN Provisioning Zoning Masking
DISASTER RECOVERY	- Snapshot SyncIQ Replication Snap Mirror Backup Validation
MONITORING	- InsightIQ Active IQ System Manager SANnav Nagios
ITSM	- ServiceNow HPSM ITIL Problem & Change Management

ABOUT ME

I'm a passionate Storage & Backup Administrator with over 10 years of experience in managing enterprise storage infrastructure, backup solutions, and disaster recovery across global environments. I enjoy optimizing storage performance, ensuring high availability, mentoring team members, and delivering reliable infrastructure solutions while maintaining operational excellence and ITIL best practices.

PROFILE

- Senior Storage & Backup Administrator with 10+ years of experience in enterprise storage infrastructure, specializing in **Dell EMC Isilon (PowerScale), PowerMax/VMAX, NetApp, SAN/NAS Administration, and Backup Solutions.**
- Proven expertise in **Storage Provisioning, Capacity Planning, Disaster Recovery, Performance Optimization, Backup & Restore Operations, Replication Technologies, and Enterprise Storage Management** for mission-critical environments.
- Skilled in **Dell EMC Networker, OneFS, InsightIQ, Unisphere, Linux, Windows Server, ServiceNow, and ITIL**, delivering high availability, operational efficiency, and 24x7 production support while collaborating with cross-functional teams.

TOTAL EXPERIENCE - 11 YEARS

2020 Oct - Present	Assistant Consultant Tata Consultancy Services Bangalore.
2015 May - 2020 Sep	Service Delivery Specialist IBM India Pvt Ltd., Chennai.

EDUCATION

- B.E (ECE) - 2010 - 2014
Velammal Institute of Technology
Chennai

PROFESSIONAL EXPERIENCE

A results-driven Storage & Backup professional with a proven history of supporting **mission-critical enterprise infrastructure** in 24x7 production environments. Experienced in designing, administering, and optimizing storage and backup solutions while maintaining high system availability, regulatory compliance, and operational efficiency.

Demonstrated success in **leading storage operations, executing disaster recovery activities, implementing backup strategies, and driving infrastructure improvements** through proactive monitoring, performance optimization, and effective stakeholder collaboration.

STORAGE ADMINISTRATION

Dell EMC Isilon (PowerScale)

- Administered and managed Dell EMC Isilon (PowerScale) clusters, ensuring high availability, scalability, and optimal performance.
- Configured and maintained SmartConnect, SmartQuotas, SnapshotIQ, SyncIQ, SMB, and NFS services.
- Performed node expansion, disk replacement, firmware upgrades, quota management, and cluster health monitoring.
- Monitored storage capacity, system health, and performance using InsightIQ and OneFS administration tools.

NetApp Storage Administration

- Managed NetApp storage infrastructure, including aggregates, storage volumes, CIFS/NFS shares, and enterprise storage resources.
- Configured and administered NetApp Snapshot technology for point-in-time recovery and data protection.
- Managed SnapMirror replication, including configuration, synchronization, monitoring, failover, failback, and Disaster Recovery (DR) operations.
- Performed storage decommissioning activities, including volume cleanup, SnapMirror relationship removal, storage reclamation, and resource retirement.
- Monitored storage utilization, capacity, and performance while supporting capacity planning and infrastructure optimization.

Dell EMC VMAX / PowerMax Administration

- Managed Dell EMC VMAX and PowerMax storage environments, ensuring high availability and optimal storage performance.
- Performed storage provisioning, LUN creation, masking, mapping, host connectivity configuration, and storage expansion.
- Executed firmware upgrades, storage migrations, replication activities, and performance optimization with minimal business impact.
- Monitored storage health, resolved infrastructure issues, and ensured SLA compliance across production environments.

Brocade SAN Switch Administration

- Administered Brocade Fibre Channel SAN switches to provide secure, reliable, and high-performance storage connectivity.
- Performed SAN zoning, switch configuration, ISL management, and fabric health monitoring.
- Diagnosed and resolved SAN connectivity and performance issues while maintaining high availability.

BACKUP & RECOVERY

Dell EMC NetWorker

- Configured, monitored, and maintained enterprise backup and recovery environments to ensure data protection and high availability.
- Designed and implemented backup strategies based on business requirements, RPO/RT0 objectives, and industry best practices.
- Scheduled and managed daily, weekly, monthly, and yearly backup jobs to ensure consistent data protection coverage.
- Performed regular restore testing to validate backup integrity, reliability, and disaster recovery readiness.
- Conducted periodic backup audits to ensure compliance with organizational policies and regulatory requirements.
- Managed tape-based backup operations, including monthly and yearly archival backups.
- Performed physical tape handling activities such as offloading, labeling, inventory management, and inserting tapes into the HP tape library.
- Monitored backup job performance, investigated failures, and resolved issues to minimize downtime and prevent data loss.
- Coordinated with cross-functional teams to align backup and disaster recovery plans with business continuity objectives.
- Maintained detailed documentation for backup configurations, schedules, policies, and recovery procedures.

RESPONSIBILITIES

- Managed and mentored a team of Storage & Backup Administrators by assigning tasks, monitoring workloads, and ensuring timely project delivery.
- Provided technical guidance, knowledge transfer (KT), and operational support to team members on storage administration and best practices.
- Led day-to-day team operations, workload planning, and resource allocation to achieve SLA commitments and business objectives.
- Collaborated with storage, backup, server, virtualization, network, and application teams to ensure seamless infrastructure support.
- Managed Incident, Problem, and Change Management activities by investigating issues, implementing approved changes, performing root cause analysis, and ensuring minimal service disruption in accordance with ITIL best practices.
- Supported Disaster Recovery (DR) activities, infrastructure upgrades, maintenance windows, and production deployments with minimal business impact.
- Ensured adherence to organizational policies, security standards, compliance requirements, and Service Level Agreements (SLAs).

CERTIFICATION AND TRAINING

- **AWS Cloud & DevOps Training** – Successfully completed comprehensive AWS Cloud and DevOps certification program from Greens Technology in 2023, covering cloud infrastructure, automation, CI/CD, and deployment practices.
- **Microsoft Certified: Azure Fundamentals (AZ-900)** – Achieved certification in 2022, demonstrating foundational knowledge of Azure services, cloud concepts, and governance.
- **EMC Associate – Information Storage and Management (ISMv4)** – Earned in 2022, validating understanding of storage systems, virtualization, backup, cloud, and storage networking concepts.
- **EMC Isilon Administration and Management – Advanced Training** – Completed in 2018, focused on advanced administration of Isilon scale-out NAS, including SmartConnect, SyncIQ, and performance tuning.
- **EMC Isilon Administration and Management – Foundation Training** – Completed in 2017, covering Isilon architecture, cluster setup, SMB/NFS management, and basic data protection.
