Pilot Viewer

Global Vision

PACKAGING , PRE-PRESS & QUALITY CHECK

- Develop pharmaceutical packaging artwork for cartons, labels, leaflets, blisters, sachets, and vials.
- Create production-ready 3D packshots using Esko Studio for packaging visualization and stakeholder reviews.
- Prepare print-ready artwork including multilingual typesetting, color management, and prepress verification.
- Support packaging lifecycle activities including artwork updates, CCR implementation, serialization, and barcode management.
- Develop mockups, dielines, and packaging assets while ensuring compliance with regulatory and packaging requirements.
- Perform artwork quality checks, preflight verification, and print readiness reviews.
- Conduct prepress file verification using Esko Pilot to ensure artwork accuracy, technical compliance, and production readiness.
- Perform text comparison and artwork validation using GlobalVision to identify content discrepancies and ensure label accuracy.
- Support Flexography, Gravure, Offset, and Digital printing processes.
- Collaborate with regulatory, marketing, and cross-functional teams to deliver high-quality packaging solutions.
- Ensure packaging compliance, artwork accuracy, and timely project execution across global markets.

ESKO

ESKO Studio Advanced

ESKO Studio Flexibles

ESKO Deskpack

3D RENDERS

- Create production-ready 3D packshots using Esko Studio for cartons, labels, blisters, sachets, and vials.
- Develop realistic packaging visualizations by applying approved artwork, packaging specifications, and print finishes.
- Generate packaging mockups and stakeholder review assets for packaging approvals.
- Ensure artwork accuracy, packaging compliance, and production-ready visualization outputs.
- Apply barcodes, trapping, ink management, trim & media boxes, and flexo tools to deliver high-quality and error-free packshots.

TEAM DEVELOPMENT

TRAINING & KNOWLEDGE SHARING

- Trained team members on Esko Studio, 3D packshot creation, packaging visualization, and artwork execution workflows.
- Conducted onboarding and mentoring sessions for new joiners and freshers across packaging and prepress functions.
- Shared knowledge on packaging artwork development, print production requirements, and quality standards.
- Guided team members on barcode implementation, trapping, ink management, and packaging compliance requirements.
- Supported skill development through knowledge-sharing sessions and best-practice workshops.

TEAM SUPPORT

RESPONSIBILITY

- Supported day-to-day team operations by managing workload allocation and ensuring timely delivery of packaging projects during lead absences.
- Performed preflight reviews, job prioritization, and task assignments to optimize resource utilization and project execution.
- Acted as a single point of contact between onsite project managers, stakeholders, and production teams to ensure seamless communication.
- Collaborated with regulatory, marketing, QA, and cross-functional teams to support packaging artwork development and implementation.
- Reviewed packaging artwork, 3D packshots, and print-ready files to ensure accuracy, compliance, and production readiness.
- Maintained adherence to quality standards, project timelines, and packaging best practices across multiple projects.
- Supported process improvements and workflow standardization to enhance team productivity and delivery efficiency.

DECLARATION

I hereby declare that the details mentioned above are true to the best of my knowledge and belief.
